26 business days of any material change in the pharmacy benefits manager's  
27 ownership.

28 **26.1-27.1-04. Prohibited practices.**

- 29 1. A pharmacy benefits manager may not request a substitution of one prescription  
30 drug for another unless:

- 1           a.    The pharmacy benefits manager requests that a lower-priced generic or  
2                    therapeutically equivalent drug be substituted for a higher-priced prescribed  
3                    drug; or
- 4           b.    The substitution is for medical reasons that benefit the covered individual and

6                    professional.
- 7           2.    A pharmacy benefits manager may not require a pharmacist or pharmacy to  
8                    participate in one contract in order to participate in another contract. The pharmacy  
9                    benefits manager may not exclude an otherwise qualified pharmacist or pharmacy  
10                   from participation in a particular network solely because the pharmacist or

12                   pharmacy benefits manager.
- 13           3.    When contracting with pharmacies, a pharmacy benefits manager may not  
14                   discriminate on the basis of copayments or days of supply. A contract must apply  
15                   the same coinsurance, copayment, and deductible to covered drug prescriptions  
16                   filled by any pharmacist or pharmacy who participates in the network.
- 17           4.    This section does not permit the substitution of an equivalent drug product contrary
