2 Century Code, relating to valuation and assessment of railroad property for property tax
3 purposes; and to provide an effective date.

4 **BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:**

5 **SECTION 1. AMENDMENT.** Section 57-05-01 of the North Dakota Century Code is
6 amended and reenacted as follows:

7 **57-05-01. Railroad property to be assessed by state board of equalization.** The
8 state board of equalization, at its annual meeting in August in each year, shall assess at its
9 actual value on the first day of January of that year, the operating property, including franchises,
10 of each railroad operated in this state including any electric or other street or interurban railway.
11 If any railroad allows any portion of its railway to be used for any purpose other than the
12 operation of a railroad, the portion of its railway while so used must be assessed in a manner
13 provided for the assessment of other real property. To enable the board to make a correct
14 valuation of property, it shall have access to all reports, estimates, and surveys of a line of
15 railroad on file in the office of the public service commission and has power to summon and
16 compel the attendance of witnesses, and to examine witnesses under oath in any matter
17 relating to the value of the property. In fixing the value of any railroad, and of branch lines and
18 sidetracks, the board must be governed by the rules prescribed for county and township
19 assessors in valuing other property in this state. The board shall make a record of the value
20 placed by it upon the property of the railroad, including the valuation per mile [1.61 kilometers]
21 of main line and of branch lines and sidetracks. Railroad property held in trust by the public
22 service commission for purposes of reorganization or reopening of the railway line is exempt
23 from assessment as provided in this section.

1 The taxable valuation of property of a railroad that charges average agricultural
2 commodity freight rates for shippers in North Dakota which are higher than the average
3 agricultural commodity freight rates charged by that railroad for shippers outside North Dakota
4 must be multiplied by a factor that is the quotient obtained by dividing the railroad's average

6 completed calendar year by the railroad's average agricultural commodity freight rates charged
7 for shippers outside North Dakota for that calendar year.
