

SENATE BILL NO. 2336

Introduced by

Senators Cook, Wardner, O'Connell

Representatives Belter, Carlson, Drovdal

1 A BILL for an Act to create and enact a new section to chapter 57-38 and subsection 10 of
2 section 57-51.1-03 of the North Dakota Century Code, relating to income tax withholding on oil
3 and gas royalty payments to nonresidents and an oil extraction tax exemption for wells
4 completed outside the Bakken and Three Forks formations; to amend and reenact sections
5 57-51.1-01, 57-51.1-02, 57-51.1-03, and 57-51.1-03.1 of the North Dakota Century Code,
6 relating to oil extraction tax rates and exemptions; to provide an effective date; and to provide
7 an expiration date.

8 **BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:**

9 **SECTION 1.** A new section to chapter 57-38 of the North Dakota Century Code is created
10 and enacted as follows:

11 **Withholding requirement for oil and gas royalty payments to nonresidents.**

12 1. For purposes of this section:

13 a. "Publicly traded partnership" means a publicly traded partnership as defined in
14 section 7704 of the Internal Revenue Code [26 U.S.C. 7704] which is not treated
15 as a corporation.

16 b. "Remitter" means any person who distributes royalty payments to royalty owners.

17 c. "Royalty owner" means a person or entity entitled to receive periodic royalty
18 payments for a nonworking interest in the production of oil or gas.

19 2. Except as provided in subsection 3, each remitter shall deduct and withhold from the
20 net amount of the royalty payment made to each nonresident individual or business
21 entity that does not have its commercial domicile in this state at the highest marginal
22 rate provided in sections 57-38-30 and 57-38-30.3. Sections 57-38-59 and 57-38-60
23 apply to the filing of the returns and payment of the tax under this subsection.

- 1 3. This section does not apply to royalty payments made to a royalty owner if the royalty
2 owner is:
- 3 a. The United States or an agency of the federal government, this state or a political
4 subdivision of this state, or another state or a political subdivision of another
5 state:
- 6 b. A federally recognized Indian tribe with respect to on-reservation oil and gas
7 production pursuant to a lease entered under the Indian Mineral Leasing Act of
8 1938 [25 U.S.C. 396a through 396g]:
- 9 c. The United States as trustee for individual Indians:
- 10 d. A publicly traded partnership;
- 11 e. An organization that is exempt from the tax under this chapter; or
- 12 f. The same person or entity as the remitter.
- 13 4. a. This section does not apply to a remitter that produced less than three hundred
14 fifty thousand barrels of oil or less than five hundred million cubic feet of gas in
15 the preceding calendar year as certified to the tax commissioner in the manner
16 and on forms prescribed by the tax commissioner.
- 17 b. Each remitter that is exempt from withholding under this subsection shall make
18 an annual return to report royalty payments that exceed the dollar amounts in
19 subsection 6 and must be reported in the same manner as provided in section
20 57-38-60.
- 21 5. a. Each year, a publicly traded partnership that is exempt from withholding under
22 subsection 3 shall transmit to the tax commissioner, in an electronic format
23 approved by the tax commissioner, each partner's United States department of
24 the treasury schedule K-1, form 1065, or form 1065-B, as applicable, filed
25 electronically for the year with the United States internal revenue service.
- 26 b. A royalty owner that is a publicly traded partnership, or organization exempt from
27 taxation under section 57-38-09, shall report to the remitter and tax commissioner
28 under oath, on a form prescribed by the tax commissioner, all information
29 necessary to establish that the remitter is not required under subsection 2 to
30 withhold royalty payments made to the partnership or organization.

1 6. If the royalty payment made to a royalty owner under this section is less than six
2 hundred dollars for the current withholding period, or is less than one thousand dollars
3 if the payment is annualized, the tax commissioner may grant a remitter's request to
4 forgo withholding the tax from the royalty payment made to that royalty owner for the
5 current withholding period or, if applicable, the royalty payments for the annual period.

6 **SECTION 2. AMENDMENT.** Subsection 10 of section 57-51.1-01 of the North Dakota
7 Century Code is amended and reenacted as follows:

8 10. "Stripper well property" means a "property" whose average daily production of oil
9 during any preceding consecutive twelve-month period, excluding condensate
10 recovered in nonassociated production, per well did not exceed ten barrels per day for
11 wells of a depth of six thousand feet [1828.80 meters] or less, fifteen barrels per day
12 for wells of a depth of more than six thousand feet [1828.80 meters] but not more than
13 ten thousand feet [3048 meters], and thirty barrels per day for wells of a depth of more
14 than ten thousand feet [3048 meters] during any preceding consecutive twelve-month
15 period outside the Bakken and Three Forks formations, and forty-five barrels per day
16 for wells of a depth of more than ten thousand feet [3048 meters] in the Bakken or
17 Three Forks formation. Wells which did not actually yield or produce oil during the
18 qualifying twelve-month period, including disposal wells, dry wells, spent wells, and
19 shut-in wells, are not production wells for the purpose of determining whether the
20 stripper well property exemption applies.

21 **SECTION 3. AMENDMENT.** Section 57-51.1-01 of the North Dakota Century Code is
22 amended and reenacted as follows:

23 **57-51.1-01. Definitions for oil extraction tax.**

24 For the purposes of the oil extraction tax law, ~~the following words and terms shall have the~~
25 ~~meaning ascribed to them in this section~~this chapter:

26 1. ~~"Average daily production" of a well means the qualified maximum total production of~~
27 ~~oil from the well during a calendar month period divided by the number of calendar~~
28 ~~days in that period, and "qualified maximum total production" of a well means that the~~
29 ~~well must have been maintained at the maximum efficient rate of production as~~
30 ~~defined and determined by rule adopted by the industrial commission in furtherance of~~
31 ~~its authority under chapter 38-08.~~

- 1 2. ~~"Average price" of a barrel of crude oil means the monthly average of the daily closing~~
2 ~~price for a barrel of west Texas intermediate cushing crude oil, as those prices appear~~
3 ~~in the Wall Street Journal, midwest edition, minus two dollars and fifty cents. When~~
4 ~~computing the monthly average price, the most recent previous daily closing price~~
5 ~~must be considered the daily closing price for the days on which the market is closed.~~
- 6 3. ~~"Horizontal reentry well" means a well that was not initially drilled and completed as a~~
7 ~~horizontal well, including any well initially plugged and abandoned as a dry hole, which~~
8 ~~is reentered and recompleted as a horizontal well.~~
- 9 4. ~~"Horizontal well" means a well with a horizontal displacement of the well bore drilled at~~
10 ~~an angle of at least eighty degrees within the productive formation of at least three~~
11 ~~hundred feet [91.44 meters].~~
- 12 5. "Oil" means petroleum, crude oil, mineral oil, casinghead gasoline, and all liquid
13 hydrocarbons that are recovered from gas on the lease incidental to the production of
14 the gas.
- 15 6.2. "Property" means the right which arises from a lease or fee interest, as a whole or any
16 designated portion thereof, to produce oil. A producer shall treat as a separate
17 property each separate and distinct producing reservoir subject to the same right to
18 produce crude oil; provided, that such reservoir is recognized by the industrial
19 commission as a producing formation that is separate and distinct from, and not in
20 communication with, any other producing formation.
- 21 7.3. ~~"Qualifying secondary recovery project" means a project employing water flooding. To~~
22 ~~be eligible for the tax reduction provided under section 57-51.1-02, a secondary~~
23 ~~recovery project must be certified as qualifying by the industrial commission and the~~
24 ~~project operator must have achieved for six consecutive months an average~~
25 ~~production level of at least twenty-five percent above the level that would have been~~
26 ~~recovered under normal recovery operations. To be eligible for the tax exemption~~
27 ~~provided under section 57-51.1-03 and subsequent thereto the rate reduction provided~~
28 ~~under section 57-51.1-02, a secondary recovery project must be certified as qualifying~~
29 ~~by the industrial commission and the project operator must have obtained incremental~~
30 ~~production as defined in subsection 5 of section 57-51.1-03~~rules of the industrial
31 commission.

- 1 ~~8.4.~~ "Qualifying tertiary recovery project" means a project for enhancing recovery of oil
2 which meets the requirements of section 4993(c), Internal Revenue Code of 1954, as
3 amended through December 31, 1986, and includes the following methods for
4 recovery:
- 5 a. Miscible fluid displacement.
 - 6 b. Steam drive injection.
 - 7 c. Microemulsion.
 - 8 d. In situ combustion.
 - 9 e. Polymer augmented water flooding.
 - 10 f. Cyclic steam injection.
 - 11 g. Alkaline flooding.
 - 12 h. Carbonated water flooding.
 - 13 i. Immiscible carbon dioxide displacement.
 - 14 j. New tertiary recovery methods certified by the industrial commission.

15 It does not include water flooding, unless the water flooding is used as an element of
16 one of the qualifying tertiary recovery techniques described in this subsection, or
17 immiscible natural gas injection. ~~To be eligible for the tax reduction provided under~~
18 ~~section 57-51.1-02, a tertiary recovery project must be certified as qualifying by the~~
19 ~~industrial commission, the project operator must continue to operate the unit as a~~
20 ~~qualifying tertiary recovery project, and the project operator must have achieved for at~~
21 ~~least one month a production level of at least fifteen percent above the level that would~~
22 ~~have been recovered under normal recovery operations. To be eligible for the tax~~
23 ~~exemption provided under section 57-51.1-03 and subsequent thereto the rate~~
24 ~~reduction provided under section 57-51.1-02, a tertiary recovery project must be~~
25 ~~certified as qualifying by the industrial commission, the project operator must continue~~
26 ~~to operate the unit as a qualifying tertiary recovery project, and the project operator~~
27 ~~must have obtained incremental production as defined in subsection 5 of section~~
28 ~~57-51.1-03~~ rules of the industrial commission.

- 29 ~~9.5.~~ "Royalty owner" means an owner of what is commonly known as the royalty interest
30 and shall not include the owner of any overriding royalty or other payment carved out
31 of the working interest.

1 ~~40.6.~~ "Stripper well property" means a "property" whose average daily production of oil
2 ~~during any preceding consecutive twelve-month period~~, excluding condensate
3 recovered in nonassociated production, per well did not exceed ten barrels per day for
4 wells of a depth of six thousand feet [1828.80 meters] or less, fifteen barrels per day
5 for wells of a depth of more than six thousand feet [1828.80 meters] but not more than
6 ten thousand feet [3048 meters], ~~and thirty barrels per day for wells of a depth of more~~
7 ~~than ten thousand feet [3048 meters] during any preceding consecutive twelve-month~~
8 ~~period~~ outside the Bakken and Three Forks formations, and forty-five barrels per day
9 for wells of a depth of more than ten thousand feet [3048 meters] in the Bakken or
10 Three Forks formation. Wells which did not actually yield or produce oil during the
11 qualifying twelve-month period, including disposal wells, dry wells, spent wells, and
12 shut-in wells, are not production wells for the purpose of determining whether the
13 stripper well property exemption applies.

14 ~~11.~~ "Trigger price" means ~~thirty-five dollars and fifty cents, as indexed for inflation. By~~
15 ~~December thirty-first of each year, the tax commissioner shall compute an indexed~~
16 ~~trigger price by applying to the current trigger price the rate of change of the producer-~~
17 ~~price index for industrial commodities as calculated and published by the United~~
18 ~~States department of labor, bureau of labor statistics, for the twelve months ending~~
19 ~~June thirtieth of that year and the indexed trigger price so determined is the trigger~~
20 ~~price for the following calendar year.~~

21 ~~12.~~ "Two-year inactive well" means ~~any well certified by the industrial commission that did~~
22 ~~not produce oil in more than one month in any consecutive twenty-four month period~~
23 ~~before being recompleted or otherwise returned to production after July 31, 1995. A~~
24 ~~well that has never produced oil, a dry hole, and a plugged and abandoned well are~~
25 ~~eligible for status as a two-year inactive well.~~

26 **SECTION 4. AMENDMENT.** Section 57-51.1-02 of the North Dakota Century Code is
27 amended and reenacted as follows:

28 **57-51.1-02. ~~Imposition of oil~~Oil extraction tax rate.**

29 There is hereby imposed an excise tax, to be known as the "oil extraction tax", upon the
30 activity in this state of extracting oil from the earth, ~~and every~~ Every owner, including any royalty

1 owner, of any part of the oil extracted is deemed for the purposes of this chapter to be engaged
2 in the activity of extracting that oil.

3 The rate of tax is six and one-half percent of the gross value at the well of the oil extracted,
4 except that the rate of tax is four and one-half percent of the gross value at the well of the oil
5 extracted in the following situations:

- 6 1. ~~For oil produced from wells drilled and completed after April 27, 1987, commonly~~
7 ~~referred to as new wells, and not otherwise exempt under section 57-51.1-03;~~
- 8 2. ~~For oil produced from a secondary or tertiary recovery project that was certified as~~
9 ~~qualifying by the industrial commission before July 1, 1991;~~
- 10 3. ~~For oil that does not qualify as incremental oil but is produced from a secondary or~~
11 ~~tertiary recovery project that is certified as qualifying by the industrial commission after~~
12 ~~June 30, 1991;~~
- 13 4. ~~For incremental oil produced from a secondary or tertiary recovery project that is~~
14 ~~certified as qualifying by the industrial commission after June 30, 1991, and which~~
15 ~~production is not otherwise exempt under section 57-51.1-03; or~~
- 16 5. ~~For oil produced from a well that receives an exemption pursuant to subsection 4 of~~
17 ~~section 57-51.1-03 after June 30, 1993, and which production is not otherwise exempt~~
18 ~~under section 57-51.1-03.~~

19 However, if the average price of a barrel of crude oil exceeds the trigger price for each month in
20 any consecutive five-month period, then the rate of tax on oil extracted from all taxable wells is
21 six and one-half percent of the gross value at the well of the oil extracted until the average price
22 of a barrel of crude oil is less than the trigger price for each month in any consecutive
23 five-month period, in which case the rate of tax reverts to four percent of the gross value at the
24 well of the oil extracted for any wells subject to a reduced rate under subsections 1 through 5
25 from a well drilled and completed after December 31, 2016.

26 **SECTION 5. AMENDMENT.** Subsection 2 of section 57-51.1-03 of the North Dakota
27 Century Code, as effective after June 30, 2013, is amended and reenacted as follows:

- 28 2. The activity of extracting from the earth any oil from a stripper well property. A well that
29 is drilled and completed in the Bakken or Three Forks formation after June 30, 2013,
30 on a stripper well property is not exempt for purposes of this exemption until

1 production from that well individually meets the requirements of the definition for
2 stripper well status under section 57-51.1-01.

3 **SECTION 6.** Subsection 10 to section 57-51.1-03 of the North Dakota Century Code is
4 created and enacted as follows:

5 10. The first seventy-five thousand barrels of oil produced during the first eighteen months
6 after completion, from a well drilled and completed outside the Bakken and Three
7 Forks formations, is subject to a reduced tax rate of two percent of the gross value at
8 the well of the oil extracted under this chapter. A well eligible for a reduced tax rate
9 under this subsection is eligible for the exemption under subsection 3, if the exemption
10 under subsection 3 is effective during all or part of the first twenty-four months after
11 completion.

12 **SECTION 7. AMENDMENT.** Section 57-51.1-03 of the North Dakota Century Code, as
13 effective after June 30, 2013, is amended and reenacted as follows:

14 **(Effective after June 30, 2013 December 31, 2016) Exemptions from oil extraction tax.**

15 The following activities are specifically exempted from the oil extraction tax:

- 16 1. The activity of extracting from the earth any oil that is exempt from the gross
17 production tax imposed by chapter 57-51.
- 18 2. The activity of extracting from the earth any oil from a stripper well property. A well that
19 is drilled and completed in the Bakken or Three Forks formation and which was spud
20 after June 30, 2013, on a stripper well property is not exempt for purposes of this
21 exemption until production from that well individually meets the requirements of the
22 definition for stripper well status under section 57-51.1-01.
- 23 3. ~~For a well drilled and completed as a vertical well, the initial production of oil from the~~
24 ~~well is exempt from any taxes imposed under this chapter for a period of fifteen~~
25 ~~months, except that oil produced from any well drilled and completed as a horizontal~~
26 ~~well is exempt from any taxes imposed under this chapter for a period of twenty-four~~
27 ~~months. Oil recovered during testing prior to well completion is exempt from the oil~~
28 ~~extraction tax. The exemption under this subsection becomes ineffective if the average~~
29 ~~price of a barrel of crude oil exceeds the trigger price for each month in any~~
30 ~~consecutive five-month period. However, the exemption is reinstated if, after the~~

1 ~~trigger provision becomes effective, the average price of a barrel of crude oil is less-~~
2 ~~than the trigger price for each month in any consecutive five-month period.~~

- 3 4. ~~The production of oil from a qualifying well that was worked over is exempt from any~~
4 ~~taxes imposed under this chapter for a period of twelve months, beginning with the~~
5 ~~first day of the third calendar month after the completion of the work-over project. The~~
6 ~~exemption provided by this subsection is only effective if the well operator establishes~~
7 ~~to the satisfaction of the industrial commission upon completion of the project that the~~
8 ~~cost of the project exceeded sixty-five thousand dollars or production is increased at~~
9 ~~least fifty percent during the first two months after completion of the project. A~~
10 ~~qualifying well under this subsection is a well with an average daily production of no~~
11 ~~more than fifty barrels of oil during the latest six calendar months of continuous~~
12 ~~production. A work-over project under this subsection means the continuous~~
13 ~~employment of a work-over rig, including recompletions and reentries. The exemption~~
14 ~~provided by this subsection becomes ineffective if the average price of a barrel of~~
15 ~~crude oil exceeds the trigger price for each month in any consecutive five-month~~
16 ~~period. However, the exemption is reinstated if, after the trigger provision becomes~~
17 ~~effective, the average price of a barrel of crude oil is less than the trigger price for~~
18 ~~each month in any consecutive five-month period.~~

- 19 5. a. The incremental production from a secondary recovery project which has been
20 certified as a qualified project by the industrial commission after July 1, 1991, is
21 exempt from any taxes imposed under this chapter for a period of five years from
22 the date the incremental production begins.
- 23 b. The incremental production from a tertiary recovery project that does not use
24 carbon dioxide and which has been certified as a qualified project by the
25 industrial commission is exempt from any taxes imposed under this chapter for a
26 period of ten years from the date the incremental production begins. Incremental
27 production from a tertiary recovery project that uses carbon dioxide and which
28 has been certified as a qualified project by the industrial commission is exempt
29 from any taxes imposed under this chapter from the date the incremental
30 production begins.

1 c. For purposes of this subsection, incremental production is defined in the following
2 manner:

3 (1) For purposes of determining the exemption provided for in subdivision a and
4 with respect to a unit where there has not been a secondary recovery
5 project, incremental production means the difference between the total
6 amount of oil produced from the unit during the secondary recovery project
7 and the amount of primary production from the unit. For purposes of this
8 paragraph, primary production means the amount of oil which would have
9 been produced from the unit if the secondary recovery project had not been
10 commenced. The industrial commission shall determine the amount of
11 primary production in a manner which conforms to the practice and
12 procedure used by the commission at the time the project is certified.

13 (2) For purposes of determining the exemption provided for in subdivision a and
14 with respect to a unit where a secondary recovery project was in existence
15 prior to July 1, 1991, and where the industrial commission cannot establish
16 an accurate production decline curve, incremental production means the
17 difference between the total amount of oil produced from the unit during a
18 new secondary recovery project and the amount of production which would
19 be equivalent to the average monthly production from the unit during the
20 most recent twelve months of normal production reduced by a production
21 decline rate of ten percent for each year. The industrial commission shall
22 determine the average monthly production from the unit during the most
23 recent twelve months of normal production and must upon request or upon
24 its own motion hold a hearing to make this determination. For purposes of
25 this paragraph, when determining the most recent twelve months of normal
26 production the industrial commission is not required to use twelve
27 consecutive months. In addition, the production decline rate of ten percent
28 must be applied from the last month in the twelve-month period of time.

29 (3) For purposes of determining the exemption provided for in subdivision a and
30 with respect to a unit where a secondary recovery project was in existence
31 before July 1, 1991, and where the industrial commission can establish an

1 accurate production decline curve, incremental production means the
2 difference between the total amount of oil produced from the unit during the
3 new secondary recovery project and the total amount of oil that would have
4 been produced from the unit if the new secondary recovery project had not
5 been commenced. For purposes of this paragraph, the total amount of oil
6 that would have been produced from the unit if the new secondary recovery
7 project had not been commenced includes both primary production and
8 production that occurred as a result of the secondary recovery project that
9 was in existence before July 1, 1991. The industrial commission shall
10 determine the amount of oil that would have been produced from the unit if
11 the new secondary recovery project had not been commenced in a manner
12 that conforms to the practice and procedure used by the commission at the
13 time the new secondary recovery project is certified.

14 (4) For purposes of determining the exemption provided for in subdivision b and
15 with respect to a unit where there has not been a secondary recovery
16 project, incremental production means the difference between the total
17 amount of oil produced from the unit during the tertiary recovery project and
18 the amount of primary production from the unit. For purposes of this
19 paragraph, primary production means the amount of oil which would have
20 been produced from the unit if the tertiary recovery project had not been
21 commenced. The industrial commission shall determine the amount of
22 primary production in a manner which conforms to the practice and
23 procedure used by the commission at the time the project is certified.

24 (5) For purposes of determining the exemption provided for in subdivision b and
25 with respect to a unit where there is or has been a secondary recovery
26 project, incremental production means the difference between the total
27 amount of oil produced during the tertiary recovery project and the amount
28 of production which would be equivalent to the average monthly production
29 from the unit during the most recent twelve months of normal production
30 reduced by a production decline rate of ten percent for each year. The
31 industrial commission shall determine the average monthly production from

1 the unit during the most recent twelve months of normal production and
2 must upon request or upon its own motion hold a hearing to make this
3 determination. For purposes of this paragraph, when determining the most
4 recent twelve months of normal production the industrial commission is not
5 required to use twelve consecutive months. In addition, the production
6 decline rate of ten percent must be applied from the last month in the
7 twelve-month period of time.

8 (6) For purposes of determining the exemption provided for in subdivision b and
9 with respect to a unit where there is or has been a secondary recovery
10 project and where the industrial commission can establish an accurate
11 production decline curve, incremental production means the difference
12 between the total amount of oil produced from the unit during the tertiary
13 recovery project and the total amount of oil that would have been produced
14 from the unit if the tertiary recovery project had not been commenced. For
15 purposes of this paragraph, the total amount of oil that would have been
16 produced from the unit if the tertiary recovery project had not been
17 commenced includes both primary production and production that occurred
18 as a result of any secondary recovery project. The industrial commission
19 shall determine the amount of oil that would have been produced from the
20 unit if the tertiary recovery project had not been commenced in a manner
21 that conforms to the practice and procedure used by the commission at the
22 time the tertiary recovery project is certified.

23 d. The industrial commission shall adopt rules relating to this exemption that the
24 exemptions under this subsection which must include procedures for determining
25 incremental production as defined in subdivision e.

26 6. The production of oil from a two-year inactive well, as determined by the industrial
27 commission and certified to the state tax commissioner, for a period of ten years after
28 the date of receipt of the certification. The exemption under this subsection becomes
29 ineffective if the average price of a barrel of crude oil exceeds the trigger price for
30 each month in any consecutive five-month period. However, the exemption is
31 reinstated if, after the trigger provision becomes effective, the average price of a barrel

1 of crude oil is less than the trigger price for each month in any consecutive five-month
2 period.

3 7. ~~The production of oil from a horizontal reentry well, as determined by the industrial~~
4 ~~commission and certified to the state tax commissioner, for a period of nine months~~
5 ~~after the date the well is completed as a horizontal well. The exemption under this~~
6 ~~subsection becomes ineffective if the average price of a barrel of crude oil exceeds the~~
7 ~~trigger price for each month in any consecutive five-month period. However, the~~
8 ~~exemption is reinstated if, after the trigger provision becomes effective, the average~~
9 ~~price of a barrel of crude oil is less than the trigger price for each month in any~~
10 ~~consecutive five-month period.~~

11 8.4. The initial production of oil from a well is exempt from any taxes imposed under this
12 chapter for a period of sixty months if:

- 13 a. The well is located within the boundaries of an Indian reservation;
14 b. The well is drilled and completed on lands held in trust by the United States for
15 an Indian tribe or individual Indian; or
16 c. The well is drilled and completed on lands held by an Indian tribe if the interest is
17 in existence on August 1, 1997.

18 9.5. The first seventy-five thousand barrels of oil produced during the first eighteen months
19 after completion, from a ~~horizontal well drilled and completed in the Bakken formation~~
20 ~~after June 30, 2007, and before July 1, 2008, outside of the Bakken or Three Forks~~
21 ~~formation~~ is subject to a reduced tax rate of two percent of the gross value at the well
22 of the oil extracted under this chapter. A well eligible for a reduced tax rate under this
23 subsection is eligible for the exemption for horizontal wells under subsection 3, if the
24 exemption under subsection 3 is effective during all or part of the first twenty-four
25 months after completion.

26 **SECTION 8. AMENDMENT.** Subsection 1 of section 57-51.1-03.1 of the North Dakota
27 Century Code is amended and reenacted as follows:

- 28 1. To receive, from the first day of eligibility, a tax exemption on production from a
29 stripper well or stripper well property under subsection 2 of section 57-51.1-03, the
30 industrial commission's certification must be submitted to the tax commissioner within

1 eighteen months after the end of the stripper well's or stripper well property's
2 qualification period.

3 **SECTION 9. AMENDMENT.** Section 57-51.1-03.1 of the North Dakota Century Code is
4 amended and reenacted as follows:

5 **57-51.1-03.1. Stripper well, ~~new well, work-over, and secondary or tertiary project~~**
6 **certification for tax exemption ~~or rate reduction~~ - Filing requirement.**

7 To receive the benefits of a tax exemption ~~or tax rate reduction~~, a certification of qualifying
8 well status prepared by the industrial commission must be submitted to the tax commissioner as
9 follows:

- 10 1. To receive, from the first day of eligibility, a tax exemption on production from a
11 stripper well or stripper well property under subsection 2 of section 57-51.1-03, the
12 industrial commission's certification must be submitted to the tax commissioner within
13 eighteen months after the end of the stripper well's or stripper well property's
14 qualification period.
- 15 2. ~~To receive, from the first day of eligibility, a tax exemption under subsection 3 of~~
16 ~~section 57-51.1-03 and a rate reduction on production from a new well under section~~
17 ~~57-51.1-02, the industrial commission's certification must be submitted to the tax~~
18 ~~commissioner within eighteen months after a new well is completed.~~
- 19 3. ~~To receive, from the first day of eligibility, a tax exemption under subsection 4 of~~
20 ~~section 57-51.1-03 and a rate reduction for a work-over well under section 57-51.1-02,~~
21 ~~the industrial commission's certification must be submitted to the tax commissioner~~
22 ~~within eighteen months after the work-over project is completed.~~
- 23 4. To receive, from the first day of eligibility, a tax exemption under subsection 5~~3~~ of
24 section 57-51.1-03 ~~and a tax rate reduction under section 57-51.1-02~~ on production
25 from a secondary or tertiary project, the industrial commission's certification must be
26 submitted to the tax commissioner within the following time periods:
 - 27 a. ~~For a tax exemption,~~ within eighteen months after the month in which the first
28 incremental oil was produced.
 - 29 b. ~~For a tax rate reduction,~~ within eighteen months after the end of the period
30 qualifying the project for the rate reduction.

1 5. ~~To receive, from the first day of eligibility, a tax exemption or the reduction on-~~
2 ~~production for which any other tax exemption or rate reduction may apply, the~~
3 ~~industrial commission's certification must be submitted to the tax commissioner within~~
4 ~~eighteen months of the completion, recompletion, or other qualifying date.~~

5 6. ~~To receive, from the first day of eligibility, a tax exemption under subsection 6 of~~
6 ~~section 57-51.1-03 on production from a two-year inactive well, the industrial~~
7 ~~commission's certification must be submitted to the tax commissioner within eighteen~~
8 ~~months after the end of the two-year inactive well's qualification period.~~

9 If the industrial commission's certification is not submitted to the tax commissioner within the
10 eighteen-month period provided in this section, then the exemption ~~or rate reduction~~ does not
11 apply for the production periods in which the certification is not on file with the tax
12 commissioner. When the industrial commission's certification is submitted to the tax
13 commissioner after the eighteen-month period, the tax exemption ~~or rate reduction~~ applies to
14 prospective production periods only and the exemption ~~or rate reduction~~ is effective the first day
15 of the month in which the certification is received by the tax commissioner.

16 **SECTION 10. EFFECTIVE DATE - EXPIRATION DATE.** Section 1 of this Act is effective for
17 taxable years beginning after December 31, 2013. Sections 2, 5, 6, and 8 of this Act are
18 effective for taxable events occurring after June 30, 2013, and before January 1, 2017, and are
19 thereafter ineffective. Sections 3, 4, 7, and 9 of this Act are effective for taxable events occurring
20 after December 31, 2016.
