

Sixty-third
Legislative Assembly
of North Dakota

REENGROSSED HOUSE BILL NO. 1210

Introduced by

Representatives Belter, Amerman, Silbernagel, Wall, J. Kelsh, Williams

Senators G. Lee, Luick, Dotzenrod

1 A BILL for an Act to create and enact a new section to chapter 61-02 of the North Dakota
2 Century Code, relating to payments in lieu of taxes to a school district for which the property tax
3 base was diminished by acquisition of property for a flood control project.

4 **BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:**

5 **SECTION 1.** A new section to chapter 61-02 of the North Dakota Century Code is created
6 and enacted as follows:

7 **Flood control project funding - Allocation of payments in lieu of taxes for loss of tax**
8 **base caused by acquisition of property in impacted school district.**

9 The flood control project authority annually shall make payments pursuant to this chapter to
10 adversely affected school districts in which property subject to valuation is located.

11 1. The payments are in lieu of taxes that otherwise would be available to the school
12 districts if the real property upon which these payments are based was not:

13 a. Acquired by the state, the United States, a political subdivision of this state, or
14 other tax-exempt entity for a flood diversion channel project; or

15 b. Assigned a reduced true and full valuation from its 2011 true and full valuation
16 which was done primarily because of the effects or anticipated effects of a flood
17 diversion channel or flood control project.

18 2. For purposes of this section:

19 a. "Adversely affected school district" means a school district that, by reason of the
20 effect of events described in subsection 1, has had a significant reduction in
21 taxable valuation of property within the school district.

22 b. "Flood control project authority" means the political subdivision or entity with land
23 acquisition authority for execution of a diversion or flood control project.

24 c. "Property subject to valuation" means:

- 1 (1) Real property acquired by the state, the United States, or a political
2 subdivision of this state, or other tax-exempt entity for use in a flood
3 diversion channel project but does not include any of that property being
4 assessed for ad valorem taxation to the owner or occupant; or
5 (2) The amount determined by subtracting the current true and full valuation of
6 property described in subdivision b of subsection 1 from that property's true
7 and full valuation for 2011.
- 8 3. For the purpose of making payments in lieu of taxes under this section, all property
9 subject to valuation under this section must be assessed and valued in the same
10 manner as other real property in this state is assessed and valued for tax purposes,
11 except the taxable valuation for the property subject to valuation may not be less than
12 the taxable valuation of the property for taxable year 2011. The county auditors of the
13 counties in which the property is located, before June thirtieth of each year, shall give
14 notice in writing to the flood control project authority and tax commissioner of the value
15 placed upon the property subject to valuation as finally equalized for taxable year 2011
16 and the most recent subsequent taxable year.
- 17 4. Upon equalization by the state board of equalization, if requested by the flood control
18 project authority, of the value placed upon the property subject to valuation, the flood
19 control project authority shall compute the payments due to the school districts in
20 which property subject to valuation is located by extending the mill levies which apply
21 to other taxable property in the school districts in which the property is located. The
22 mill levies must be extended against the property subject to valuation in the same
23 manner as used for other taxable property in the school districts, except the minimum
24 amount determined for taxable valuation of property subject to valuation under this
25 section must be substituted, if applicable. The payments due to each school district
26 are the amount determined as provided in this section.
- 27 5. After computing the payments due to each school district, the flood control project
28 authority shall remit to the school districts the amounts due, on or before March first of
29 the succeeding year after the assessments and valuations were made.
