

April 2, 2015

PROPOSED AMENDMENTS TO ENGROSSED HOUSE BILL NO. 1176

Page 5, line 6, after the period insert "However, if the average statewide production of oil meets or exceeds one million two hundred thousand barrels of oil per day in the month of February 2016, allocations to the county occurring after June 30, 2016, must be increased to forty percent of all annual revenue exceeding five million dollars. An additional five percent of all annual revenue exceeding five million dollars also must be allocated to the department of transportation for allocation among non-oil-producing counties at the times revenues are distributed to oil-producing counties under this section. The allocation to each non-oil-producing county must be proportional to each non-oil-producing county's estimated unmet road and bridge investment needs relative to the combined total of estimated unmet road and bridge investment needs of all the eligible non-oil-producing counties. For purposes of this subdivision:

- (1) "Average statewide production" means the number of barrels of oil produced from wells within this state during the calendar month divided by the number of calendar days in that month, as determined by the industrial commission.
- (2) "Estimated unmet road and bridge investment needs" means a county's total estimated road and bridge investment needs for the years 2015 to 2034 identified in the most recently completed report by the upper great plains transportation institute less the amount distributed to the county under subsection 2 of section 2 of Senate Bill No. 2103, as approved by the sixty-fourth legislative assembly.
- (3) "Non-oil-producing counties" means the forty-three counties that received no allocation of funding or a total allocation under this subsection of less than five million dollars for the period beginning September 1, 2013, and ending August 31, 2014."
