

**HOUSE BILL NO. 1163**

Introduced by

Representatives Keiser, Delmore, K. Koppelman

Senators Armstrong, Grabinger, Hogue

1 A BILL for an Act to create and enact chapter 51-36 of the North Dakota Century Code, relating  
2 to bad faith assertions of patent infringement; and to provide a penalty.

3 **BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:**

4 **SECTION 1.** Chapter 51-36 of the North Dakota Century Code is created and enacted as  
5 follows:

6 **51-36-01. Definitions.**

7 In this chapter, unless the context or subject matter otherwise requires:

8 1. "Demand letter" means a letter, email, or other communication asserting or claiming  
9 the target engaged in patent infringement.

10 2. "Target" means any person:

11 a. That receives a demand letter or against whom an assertion or allegation of  
12 patent infringement is made;

13 b. That is threatened with litigation or against whom a lawsuit is filed alleging patent  
14 infringement; or

15 c. Whose customer receives a demand letter asserting that the person's product,  
16 service, or technology infringes a patent.

17 **51-36-02. Bad faith assertion of patent infringement prohibited.**

18 A person may not make a bad faith assertion of patent infringement as prohibited by this  
19 chapter.

20 **51-36-03. Factors for bad faith assertion of infringement.**

21 A court may consider any of the following factors as evidence a person made a bad faith  
22 assertion of patent infringement:

23 1. The demand letter does not contain the following information:

24 a. The patent number;

- 1            b. The name and address of the patent owner and assignee, if any; or
- 2            c. Factual allegations concerning the specific areas in which the target's product,
- 3            service, or technology infringe the patent or are covered by the claim in the
- 4            patent.
- 5            2. Before sending the demand letter, the person fails to conduct an analysis comparing
- 6            the claim in the patent to the target's product, service, or technology, or such an
- 7            analysis was done but does not identify the specific area in which the product, service,
- 8            or technology is covered by the claim in the patent.
- 9            3. The demand letter lacks the information described in subsection 1, the target requests
- 10           the information, and the person fails to provide the information within a reasonable
- 11           period of time.
- 12           4. The demand letter demands payment of a license fee or a response within an
- 13           unreasonably short period of time.
- 14           5. The person offers to license the patent for an amount that is not based on a
- 15           reasonable estimate of the value of the license.
- 16           6. The claim of patent infringement is unenforceable and the person knew, or should
- 17           have known, the claim is unenforceable.
- 18           7. The claim of patent infringement is deceptive.
- 19           8. The person, a subsidiary, or an affiliate previously filed or threatened to file a lawsuit
- 20           based on the same or a similar claim of patent infringement and:
- 21           a. The threat or lawsuit lacked the information described in subsection 1; or
- 22           b. The person attempted to enforce the claim of patent infringement in litigation and
- 23           a court found the claim to be unenforceable.
- 24           9. The person making the assertion of infringement of a patent does not own or have the
- 25           right to enforce or license the patent.
- 26           10. The person sent the same demand or substantially same demand to multiple
- 27           recipients and made assertions against a variety of products and systems without
- 28           reflecting product and system differences in a reasonable manner in the demands.
- 29           11. The person threatens legal action that cannot legally be taken or that is not intended to
- 30           be taken.

1        12. The person represents a complaint has been filed alleging the target has infringed the  
2            patent when no complaint has been filed.

3        13. The claim of patent infringement is based on a patent or a claim of a patent that has  
4            expired or previously been held invalid or unenforceable in a final unappealable or  
5            unappealed judicial or administrative decision.

6        14. Any other factor the court finds relevant.

7        **51-36-04. Factors for claim of patent infringement not made in bad faith.**

8        A court may consider the following factors as evidence a person has not made a bad faith  
9        assertion of patent infringement:

10       1. The demand letter contains all of the information described in subsection 1 of section  
11       51-36-03.

12       2. If the demand letter lacks the information described in subsection 1 of section  
13       51-36-03 and the target requests the information, the person provides the information  
14       within a reasonable period of time.

15       3. The person engages in a good faith effort to establish the target has infringed the  
16       patent and to negotiate an appropriate remedy.

17       4. The person makes a substantial investment in the use of the patent or in the  
18       production or sale of a product or item covered by the patent.

19       5. The person is:

20       a. The inventor or joint inventor of the patent or, in the case of a patent filed by and  
21       awarded to an assignee of the original inventor or joint inventor, is the original  
22       assignee; or

23       b. An institution of higher education or a technology transfer organization owned or  
24       affiliated with an institution of higher education.

25       6. The person has:

26       a. Demonstrated good faith business practices in previous efforts to enforce the  
27       patent or a substantially similar patent; or

28       b. Successfully enforced the patent, or a substantially similar patent, through  
29       litigation.

30       7. Any other factor the court finds relevant.

1        **51-36-05. Bond.**

2        Upon motion by a target and a finding by the court that the target has established a  
3 reasonable likelihood a person has made a bad faith assertion of patent infringement in  
4 violation of this chapter, the court shall require the person to post a bond in an amount equal to  
5 a good faith estimate of the target's costs to litigate the claim and amounts reasonably likely to  
6 be recovered under this chapter, conditioned upon payment of any amounts finally determined  
7 to be due to the target. The court shall hold a hearing to determine the amount of the bond on  
8 the request of either party. A bond ordered under this section may not exceed two hundred fifty  
9 thousand dollars. The court may waive the bond requirement if the court finds the person has  
10 available assets equal to the amount of the proposed bond or for other good cause shown.

11       **51-36-06. Private right of action.**

12       A target of conduct involving assertions of patent infringement or a person aggrieved by a  
13 violation of this chapter may bring an action in a court of proper jurisdiction. A court may award  
14 the following remedies to a plaintiff that prevails in an action brought pursuant to this section:

- 15       1. Equitable relief;  
16       2. Damages;  
17       3. Costs and fees, including reasonable attorney fees; and  
18       4. Exemplary damages in an amount equal to fifty thousand dollars or three times the  
19       total of damages, costs, and fees, whichever is greater.

20       **51-36-07. Enforcement - Powers - Remedies - Penalty.**

21       The attorney general may enforce this chapter. The attorney general, in enforcing this  
22 chapter, has all the powers provided in chapter 51-15 and may seek all the remedies in chapter  
23 51-15. Each act in violation of this chapter constitutes a separate violation of chapter 51-15. The  
24 remedies, duties, prohibitions, and penalties of this chapter are not exclusive and are in addition  
25 to all other causes of action, remedies, and penalties in chapter 51-15, or otherwise provided by  
26 law.

27       **51-36-08. Exceptions.**

28       This chapter does not apply to:

- 29       1. Any person that owns or has the right to license or enforce a patent to notify another of  
30       that ownership or right of license or enforcement, to notify another that the patent is  
31       available for license or sale; notify another of the infringement of that patent pursuant

- 1           to the provisions of title 35 of the United States Code; or seek compensation on  
2           account of a past or present infringement, or for a license, if it is reasonable to believe  
3           that the person from whom compensation is sought may owe such compensation.
- 4        2. Any demand letter sent by:
- 5           a. Any corporation traded on a public stock exchange or any entity owned or  
6           controlled by such corporation;
- 7           b. An owner of the patent which is using the patent in connection with the  
8           production, manufacturing, processing, or delivery of products or materials;
- 9           c. Any institution of higher education as that term is defined in section 101 of the  
10          federal Higher Education Act of 1965 [20 U.S.C. 1001]; or
- 11          d. Any technology transfer organization whose primary purpose is to facilitate the  
12          commercialization of technology developed by an institution of higher education.
