SECTION 17. AMENDMENT. Section 6-09.4-06 of the North Dakota Century Code is amended and reenacted as follows:

6-09.4-06. Lending and borrowing powers generally.

1. The public finance authority may lend money to political subdivisions or other contracting parties through the purchase or holding of municipal securities which, in the opinion of the attorney general, are properly eligible for purchase or holding by the public finance authority under this chapter or chapter 40-57 and for purposes of the public finance authority's capital financing program the principal amount of any one issue does not exceed five hundred thousand dollars. However, the public finance authority may lend money to political subdivisions through the purchase of securities issued by the political subdivisions through the capital financing program without regard to the principal amount of the bonds issued, if the industrial commission approves a resolution that authorizes the public finance authority to purchase the securities. The capital financing program authorizing resolution must state that the industrial commission has determined that private bond markets will not be responsive to the needs of the issuing political subdivision concerning the securities or, if it appears that the securities can be sold through private bond markets without the involvement of the public finance authority, the authorizing resolution must state reasons for the public finance authority's involvement in the bond issue. The public finance authority may hold such municipal securities for any length of time it finds to be necessary. The public finance authority, for the purposes authorized by this chapter or chapter 40-57, may issue its bonds payable solely from the revenues available to the public finance authority which are authorized or pledged for payment of public finance authority obligations, and to otherwise assist political subdivisions or other contracting parties as provided in this chapter or chapter 40-57.
2. The public finance authority may lend money to the Bank of North Dakota under terms and conditions requiring the Bank to use the proceeds to make loans for agricultural improvements that qualify for assistance under the revolving loan fund program established by chapter 61-28.2.
3. The public finance authority may transfer money to the Bank for allocations to the long-term care facility loan fund under chapter 6-09.16. The obligation of the state to pay the bond payments is subject to the biennial appropriations by the legislative assembly. Neither the obligation of the state to pay the bonds nor the obligation of the issuer to pay debt service will constitute a debt of the state or any agency or political subdivision of the state within the meaning of any constitutional or statutory provision. The issuance of the bond does not directly or contingently obligate the state to pay the bond payments beyond the appropriation for the current biennium of the state. The issuer has no taxing power.
4. Bonds of the public finance authority issued under this chapter or chapter 40-57 are not in any way a debt or liability of the state and do not constitute a loan of the credit of the state or create any debt or debts,

liability or liabilities, on behalf of the state, or constitute a pledge of the faith and credit of the state, but all such bonds are payable solely from revenues pledged or available for their payment as authorized in this chapter. Each bond must contain on its face a statement to the effect that the public finance authority is obligated to pay such principal or interest, and redemption premium, if any, and that neither the faith and credit nor the taxing power of the state is pledged to the payment of the principal of or the interest on such bonds. Specific funds pledged to fulfill the public finance authority's obligations are obligations of the public finance authority.

5. All expenses incurred in carrying out the purposes of this chapter or chapter 40-57 are payable solely from revenues or funds provided or to be provided under this chapter or chapter 40-57 and nothing in this chapter may be construed to authorize the public finance authority to incur any indebtedness or liability on behalf of or payable by the state.

SECTION 18. AMENDMENT. Section 6-09.4-10 of the North Dakota Century Code is amended and reenacted as follows:

6-09.4-10. Reserve fund.

1. The public finance authority shall establish and maintain a reserve fund in which there must be deposited all moneys appropriated by the state for the purpose of the fund, all proceeds of bonds required to be deposited therein by terms of any contract between the public finance authority and its bondholders or any resolution of the public finance authority with respect to the proceeds of bonds, any other moneys or funds of the public finance authority which it determines to deposit therein, any contractual right to the receipt of moneys by the public finance authority for the purpose of the fund, including a letter of credit or similar instrument, and any other moneys made available to the public finance authority only for the purposes of the fund from any other source or sources. Moneys in the reserve fund must be held and applied solely to the payment of the interest on and the principal of bonds and sinking fund payments as the same become due and payable and for the retirement of bonds, including payment of any redemption premium required to be paid when any bonds are redeemed or retired prior to maturity. Moneys in the reserve fund may not be withdrawn therefrom if the withdrawal would reduce the amount in the reserve fund to an amount less than the required debt service reserve, except for payment of interest then due and payable on bonds and the principal of bonds then maturing and payable and sinking fund payments and for the retirement of bonds in accordance with the terms of any contract between the public finance authority and its bondholders and for the payments on account of which interest or principal or sinking fund payments or retirement of bonds, other moneys of the public finance authority are not then available in accordance with the terms of the contract. The required debt service reserve must be an aggregate amount equal to at least the largest amount of money required by the terms of all contracts between the public finance authority and its bondholders to be raised in the then current or any succeeding calendar year for the payment of interest on and maturing principal of outstanding bonds, and sinking fund payments required by the terms of any contracts to sinking funds established for the payment or redemption of the bonds.

2. If the establishment of the reserve fund for an issue or the maintenance of an existing reserve fund at a required level under this section would necessitate the investment of all or any portion of a new reserve fund or all or any portion of an existing reserve fund at a restricted yield, because to not restrict the yield may cause the bonds to be taxable under the Internal Revenue Code, then at the discretion of the public finance authority no reserve fund need be established prior to the issuance of bonds or the reserve fund need not be funded to the levels required by other subsections of this section or an existing reserve fund may be reduced.
3. No bonds may be issued by the public finance authority unless there is in the reserve fund the required debt service reserve for all bonds then issued and outstanding and the bonds to be issued. Nothing in this chapter prevents or precludes the public finance authority from satisfying the foregoing requirement by depositing so much of the proceeds of the bonds to be issued, upon their issuance, as is needed to achieve the required debt service reserve. The public finance authority may at any time issue its bonds or notes for the purpose of providing any amount necessary to increase the amount in the reserve fund to the required debt service reserve, or to meet such higher or additional reserve as may be fixed by the public finance authority with respect to such fund.
4. In order to assure the maintenance of the required debt service reserve, there shall be appropriated by the legislative assembly and paid to the public finance authority for deposit in the reserve fund, such sum, if any, as shall be certified by the industrial commission as necessary to restore the reserve fund to an amount equal to the required debt service reserve. However, the commission may approve a resolution for the issuance of bonds, as provided by section 6-09.4-06, which states in substance that this subsection is not applicable to the required debt service reserve for bonds issued under that resolution.
5. If the maturity of a series of bonds of the public finance authority is three years or less from the date of issuance of the bonds, the public finance authority may determine that no reserve fund need be established for that respective series of bonds. If such a determination is made, holders of that respective series of bonds may have no interest in or claim on existing reserve funds established for the security of the holders of previously issued public finance authority bonds, and may have no interest in or claim on reserve funds established for the holders of subsequent issues of bonds of the public finance authority.
6. The industrial commission may determine that this section is inapplicable in whole or in part for bonds issued under ~~section~~:
 - a. Section 6-09.4-06;
 - b. Section 6-09.4-24; or under the
 - c. The public finance authority's state revolving fund program.

SECTION 19. A new section to chapter 6-09.4 of the North Dakota Century Code is created and enacted as follows:
