

As a rancher with over a few hundred deer wintering in my yard id ask you to pass HB 1151. It would help keep the deer spread out and in smaller numbers if more people would put out feed and bales for the deer. From my observations a bait pile that only attracts 15 to 20 deer will only help to keep the deer from congregating and it would also help save my feed supply if there was a food source away from my hay/feed yard. Please vote yes and pass HB1151.
