BREAKING BARRIERS

Japanese DSU student overcomes challenges to earn agriculture degree

> By Jason R. O'Day The Dickinson Press

Dickinson s soon as Yuuka Taniguchi stepped off the plane in North Dakota, she knew she was in for the adventure of a lifetime, but little did she know that her entire paradigm would shift courtesy of her experiences in a small community of a little more than 650 people. Coming from a small town on the northern Japanese Island of Hokkaido, Yuuka was used to living in a tight-knit community surrounded by farmland, but the agricultural practices she observed in North Dakota were completely different than what she was used to and fascinating to the teenage Japanese exchange student.

Taniguchi arrived in 2016 her junior year. She attended New England High School alongside another foreign exchange student named Tamar Antia from the eastern European country of Georgia. Together they lived with their host family, Eric and Naomi Wood, Yuuka said she and Antia went to New England because Dickinson wasn't accepting foreign exchange students that year. After finishing up her junior year she returned to Japan to finish high school. Longing for the

Yuuka Taniguchi found a new friend during an ag tour at a farm in southwest North Dakota

experiences and rolling prairies of southwest North Dakota, she returned in 2018 to begin her study of Agriculture at Dickinson State University.

Naomy said she's very impressed with what both of her exchange students have gone on to do, noting that Tamar is now a microbiologist back in her home country. Between 2014 and 2020 Naomi and her husband took in eight international students, four of them from Japan — noting that the Japanese students

struggled the most with the language barrier.

"She (Yuuka) was just a headstrong girl who was like I'm doing this, I'm gonna do that and I'm gonna get it done." Naomi said in an interview with The Dickinson Press.

'Amazed at the differences'

Yuuka's home province on the northern Japanese island of Hokkaido is Agriculture dominant, with an economy centered on the Industry. Shimizu, her hometown, has a 3 to 1 cow to human ratio and lies in a wet area with an annual average of 46 inches of

precipitation.
"I was amazed by how different the agricultural practices were. And that

kind of started me on pursuing agricultural studies," she said. "In high school, I had multiple classmates who were involved in their family business. I didn't see that many farm kids getting involved in their family business in Janan."

Japan."
Her family has a dairy farm with 300-400 cattle on 48 hectares, or 119 acres, which made life a little more cloistered for the cows than typical in the United States.

"Our dairy cattle actually don't go grazing in the field. They just stay in the barn... So they just walk around the barn freely," Yuuka said. "Here it feels like (farmers) are more advanced with animal welfare."

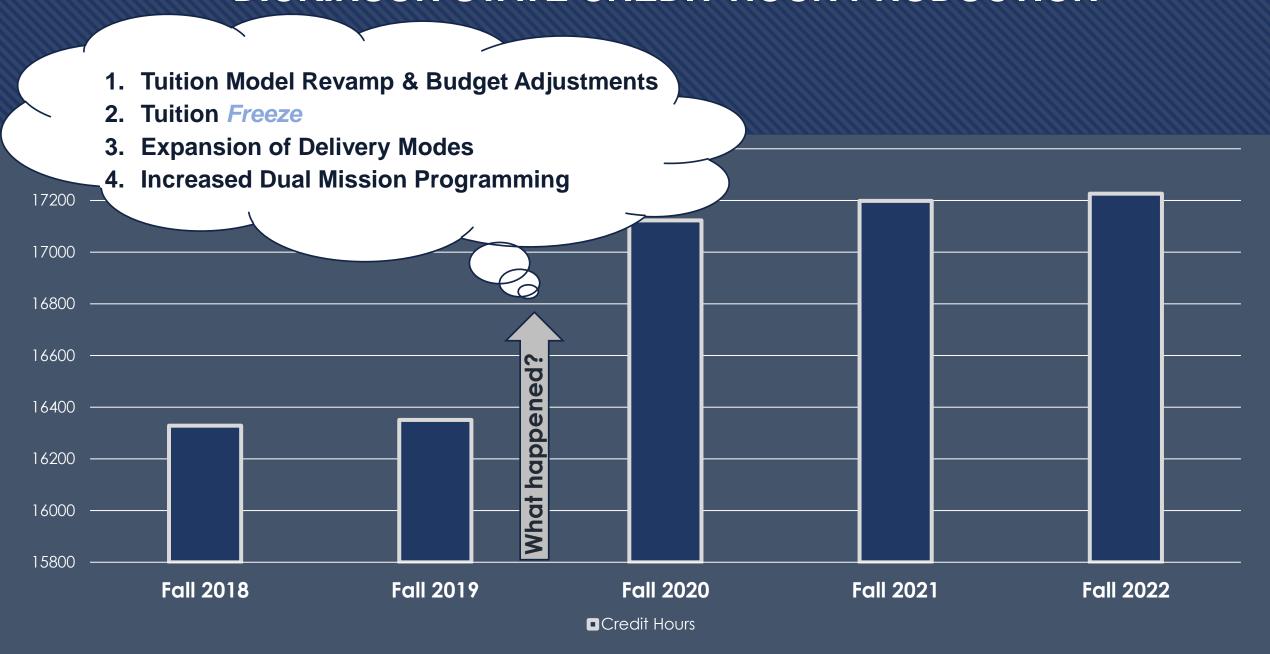

She said the language barrier was especially tough during her first few months on the Western Edge.

"I still have struggles with English now. But back then it was at a different level. Like the first couple months I couldn't respond much because I'm trying to still understand, but they're expecting my response and my brain kind of freezes," Yuuka said, adding that her friends and host family were very helpful in her gaining confidence and learning. "They were constantly trying to get me to express my feelings, thoughts and so on. They were very patient."

During her time at DSU she said Blue 42 was one of her favorite

DICKINSON STATE CREDIT HOUR PRODUCTION

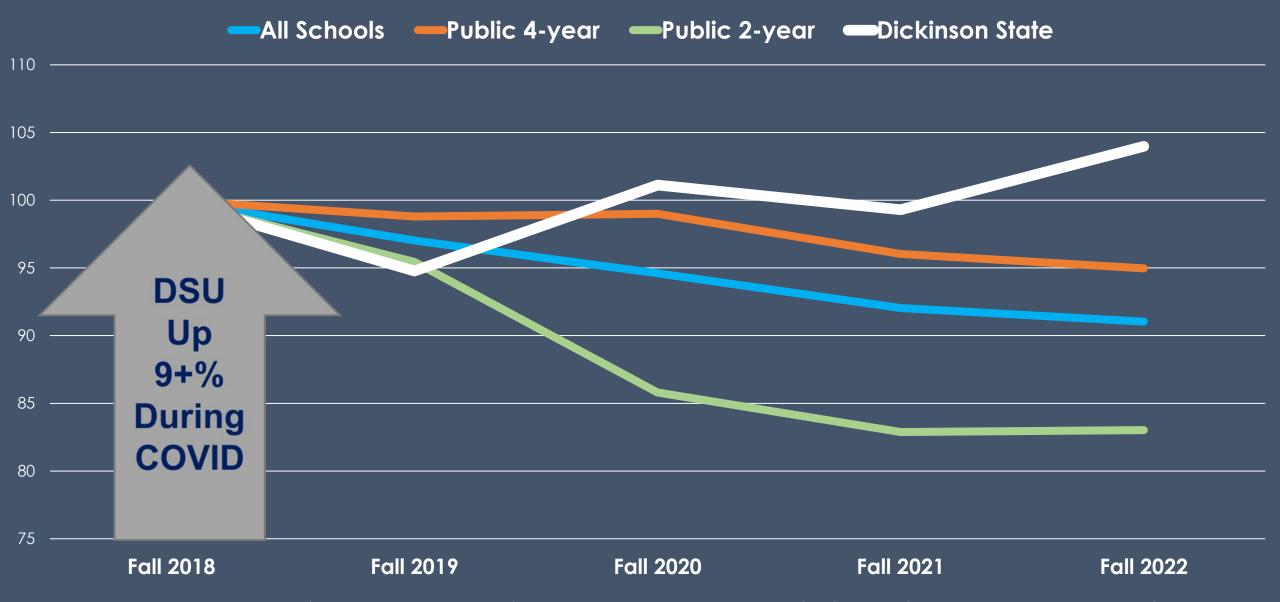

KEY FINDINGS FROM 2022-23 CENSUS REPORTS From Fall 2022 Census Report:

- Overall enrollment headcount increased from 1415 to 1473 (4.10%).
- Transfer students increased from 149 to 159 (6.71%).
- Early Entry/Dual Credit increased from 143 to 229 (60.1%).
- Part-time enrollment increased from 425 to 488 (14.8%).

From Spring 2023 Census: Head count up 3.4% over previous year.

ENROLLMENT BY INSTITUTION TYPE

Note: Fall 2018 data set at 100% with subsequent years showing percentage change each year. Historical data is based on reports from the National Center for Education Statistics. Fall 2022 results are a national 1.1% decline in enrollment and a 1.7% enrollment increase for 2-year schools. Dickinson State University's number is based on the Fall 2022 Census Report.

JANUARY 2020 BUDGET REDUCTION SUMMARY

Elimination of 14 Occupied Positions*	\$864,676
Vacated Positions Left Unfilled*	\$2,582,387
Early Retirements and Voluntary Separations*	\$689,881

Total Reductions / Biennial Savings \$5,307,157

\$1,170,213

*DSU reduced a total of 36 FTE

Non-Personnel Budget Cuts

2021-2022 Expenditures*

Budget Savings Needed*

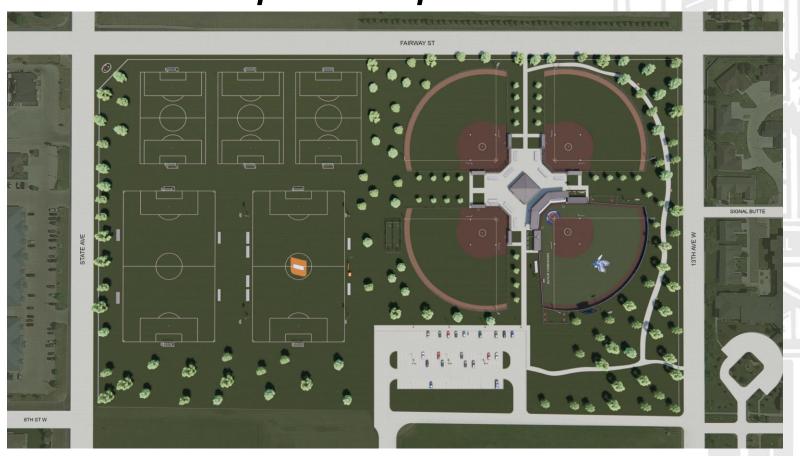

- 1) \$15.5 million: Full-Time Salary and Benefits
- 1) Amount to Be Determined: CTE Start Up
- DICKINSON STATE UNIVERSITY

- 2) \$17.5 million: Budgeted 2023-24 Full-Time Salary and Benefits
- 2) \$80,000; Increased compensation for "other"

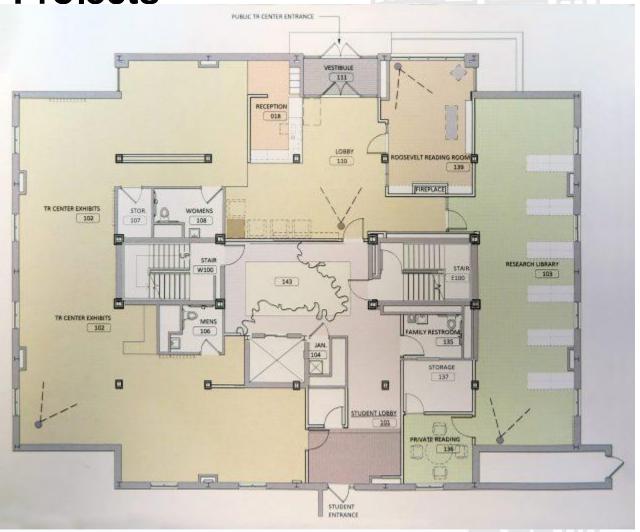

- 3) \$12.9 million: Other Operating Expenses
- 3) \$1.03 million: Inflation (assuming 8% inflation)
- 4) Amount to Be Determined: Major Maintenance

A Revolution...

- ... in the way historians conduct research, in the way history gets written, in the connections we'll be able to make that we likely never could have seen before, in the way teachers teach students about our nation's past, in the way we understand TR.
- ... that goes far beyond TR—historians and students and interested people will use the TRDL to learn more about Panama, the U.S. Navy, American diplomacy, New York state government, conservation, third-party politics ... and on and on.
- ... that goes beyond North Dakota—because people will access this site in Amsterdam and in Algeria, in every place where there's a computer and access to the worldwide web.

Stacy Cordery Roosevelt scholar
